

Touch-It-Once Efficiency

“We’ve had a long relationship with Benchmark. Our collections are at 99% so we are able to spend our time focusing on our patients needs...as it should be.”

Sandy Bezell
Lynchburg Surgical Associates

Your patients and practice are unique. Your Electronic Health Records (EHR) system and Practice Management tools should be too.

Benchmark Systems delivers true flexibility, functionality and simplicity. It’s easy to optimize productivity and reduce costs without interrupting workflow or delivery of patient care. We work with you to understand your challenges and goals, then design “touch-it-once” solutions specifically tailored to your practice.

Like you, we have a passion for care. Much more than a typical technology provider, we’ve made it our mission to help physicians and healthcare providers practice medicine. Our fully-integrated suite of solutions, which includes EHR, Practice Management, Patient Portal, Scheduling and Revenue Cycle Management, was built leveraging over 30 years

of expertise in helping healthcare providers solve profitability and time-management issues. In fact, thousands of physicians in over 120 specialties use Benchmark’s integrated solutions every day.

Why? Because we don’t expect you to alter your practice to fit our technology solutions. Instead, our multi-tiered architecture adjusts to meet your individual preferences and even allows you to easily modify and build templates on the fly.

Ready to streamline operations, lower expenses and increase collections without turning your practice inside-out? Then you’re ready for Benchmark.

“We chose Benchmark because of their **local service, reasonable price and software that’s easy to use.** We remain a customer because they are always available and they listen to our needs.” Kim Hunter, Piedmont Eye Center

With Benchmark, you maintain control by choosing the path that’s best for you and your practice. Select individual solutions designed to enhance clinical and operational efficiency or outsource your entire back-office using our virtual office management team. Install software directly on your practice’s servers or access solutions remotely via a network-based system hosted at the largest secure database facility in the U.S.

Regardless of the solutions, services and delivery model you employ, our team is here to support your success. We not only provide complete end-to-end implementation services, but also offer a variety of support and training options to ensure that your entire staff has the know-how and confidence to fully utilize your Benchmark solutions.

What can you do with Benchmark? You can see more patients and easily access their records, diagnostic data and more at any time from anywhere. Document every patient encounter at the point of care. Hasten test and treatment orders by connecting to any lab, radiology, practice management or pharmacy systems using our

HL7 interfaces. Ensure compliance and continuity of care as Benchmark maintains and continually updates all major files, including ICD-9, CPT, drug and formulary data, national pharmacy lists, insurance company rules, Medicare fee tables and more.

On the business side, you can minimize and even eliminate manual tasks and paperwork by automating workflows. Simplify scheduling, billing and reimbursements, shorten A/R times and improve cash flow to build your bottom line. You can even benchmark your financial success against practices similar to your own.

As a CCHIT certified vendor, Benchmark has the experience and expertise to help you significantly lower expenses while improving patient care with our flexible advanced technology and superior customer service. To understand the full scale of our solutions and commitment to your success, we encourage you to contact us directly. We look forward to learning about your practice and demonstrating the power of Benchmark’s affordable solutions and services.
